

Residential Energy Efficiency Rebates

Rebate Requirements

Electric to natural gas furnace conversion eligibility still requires customer to heat primarily with electric straight resistance. Customer usage will be reviewed and must demonstrate that at least 8,000 kilowatt-hours of electric straight resistance heat and less than 340 therms occurred in the last 12 months in order to be eligible for rebate. For weatherization rebates usage must be over 8,000 kilowatt-hours of electric straight resistance heat or over 340 therms for natural gas customers.

2019 Changes to Residential Energy Efficiency Rebates

Residential	2018	2019	Notes
Weatherization			
Replacement Windows-Single Pane to Double .30 or less U-factor	\$1.50	\$3	Increased Incentive Per sq. ft. of Window
Storm Windows	\$1	\$2	Increased Incentive Per sq. ft. of Storm Window
Attic Insulation (existing \leq R11 to \geq R49 insulation)	\$0	\$0.45	New Measure Per sq. ft. of Insulation
Wall Insulation (existing none to \geq R11 insulation)	\$0	\$0.40	New Measure Per sq. ft. of Insulation
Floor Insulation (existing none to \geq R19 insulation)	\$0	\$0.20	New Measure Per sq. ft. of Insulation
High Efficiency Equipment			
High Efficiency Natural Gas Furnace/Boiler (90% AFUE or greater)	\$300	\$300	
Variable Speed Motor (AKA-ECM)	\$80	\$80	
High Efficiency Natural Gas Furnace/Boiler + (Electric) Variable Speed Motor	\$380	\$380	
Electric Heat Pump Water Heater (\geq 1.80 UEF)	\$200	\$215	Increased Incentive
Natural Gas Tankless Water Heater (\geq 0.82 UEF)	\$200	\$215	Increased Incentive
Natural Gas Water Heater (\geq 0.65 UEF)	\$0	\$60	New Measure

Residential Energy Efficiency Rebates continued on the back

2019 Changes to Residential Energy Efficiency Rebates

Residential	2018	2019	Notes
Heat Conversions			
Electric baseboard to Ductless Heat Pump (HSPF 9.0 or greater)	\$500	\$500	
Electric to Air Source Heat Pump	\$700	\$700	
Electric to Natural Gas Wall Heater or Stove	\$1,300	\$0	Measure Discontinued
Electric to Natural Gas Furnace	\$1,500	\$1,200	Decreased Incentive
Electric to Natural Gas Furnace + Water Heat - Combo	\$2,250	\$1,700	Decreased Incentive
Miscellaneous			
WiFi Enabled Thermostat - Contractor Install	\$75	\$75	
WiFi Enabled Thermostat - Self Install	\$60	\$60	
Energy Star Rated Manufactured Home - Electric or Electric/Gas Customer	\$1,000	\$650	Decreased Incentive
Energy Star Rated Manufactured Home - Gas Only Customer	\$650	\$200	Decreased Incentive
Multi-Family			
Multi-family Natural Gas Furnace or Boiler (90% AFUE or greater)	\$50	\$50	
Multi-family Conversion from Electric to Natural Gas Water Heat	\$350	\$0	Measure Discontinued
Multi-family Conversion from Electric to Natural Gas Furnace	\$350	\$350	
Multi-family Conversion from Electric to Natural Gas Furnace + Water Heat - Combo	\$700	\$700	

Rebate changes are effective January 1, 2019, however, customers will have until January 31, 2019 to submit applications for 2018 rebates that are decreasing in 2019.
