

Be alert to invisible
carbon monoxide.

Purchase and
install a carbon
monoxide
detector today.

Natural gas is non-toxic and is the cleanest burning fossil fuel available. But if natural gas isn't burned properly, say, because of a faulty furnace, it can emit carbon monoxide (CO), a colorless, odorless gas that can cause flu-like symptoms and even death. Be alerted when CO is present. Install a UL-listed carbon monoxide detector.

We just want you to be safe.
