

Join thousands of your neighbors already supporting green energy.

Last year, 3,500 forward-looking Avista customers did their part to offset carbon emissions—to an amount equivalent to growing 864,395 tree seedlings for 10 years or getting 11,099 gasoline vehicles off the road. They signed up for My Clean Energy—a program that lets you offset your monthly electric usage by supporting clean generation like wind and solar—for as little as one dollar per month added to your bill.

For additional information including environmental benefits, projects that we support and other FAQs visit myavista.com/MyCleanEnergy.
