

**Be alert to  
invisible  
carbon  
monoxide.**

**AVISTA®**

**Purchase and install  
a carbon monoxide  
detector today.**

When natural gas isn't burned properly, say, because of a faulty furnace, it can emit carbon monoxide (CO), a colorless, odorless gas that can cause flu-like symptoms and even death. Be alerted when CO is present. Install a UL-listed carbon monoxide detector. **We just want you to be safe.**
